From 28 days until 7 days prior to tour start, the fee is 50%. No refund is possible for cancellations less than 7 days prior to tour start, or for no shows, and a tour begun, but not completed.

## ITINERARY

### Day 1: Westman Islands

We travel from Reykjavík to South Iceland where we take a short ferry ride to the Westman Islands. There is a bus and walking tour of the village of Heimaey and this extraordinary island. The volcanic eruption in 1973 is, without doubt, considered the largest natural disaster in Iceland in recent history. The eruption began on January 23rd on the island of Heimaey, the only populated island of the Vestmannaeyjar archipelago. After the evacuation of the inhabitants, and during the 5 months while the eruption lasted, there was much uncertainty as to whether the island could ever be repopulated. During our tour to the Westman Islands, we explore bird cliffs, walk up the volcano crater and visit "Pompeii of the North", a volcanic excavation project. You have the afternoon free to wander around the town of Heimaey, with its birds and sign of recent volcanic eruptions. We return to the mainland and stay for 2 nights in South Iceland.

*Overnight location:*

*Hotel Stracta, Hella, South Iceland. (210km / 130mils)*

*Heimaey island and puffins*

## Day 2: South Coast and Lava Show

Our first stop of the day will be at the high but narrow Seljalandsfoss waterfall which plunges over the mountains and where you can follow a slick and wet trail right behind the falls. We visit the thundering Skógafoss waterfall which is 62 meters high and belongs to the most impressive waterfalls in the country. Nearby is the beautiful Skógar folk museum with its turf houses. We pass the glaciers Mýrdalsjökull and the infamous volcano Eyjafjallajökull. In the village of Vík, we attend the stunning Iceland lava show; the only exhibition in the world where you can experience actual flowing lava! By melting lava and pouring it on ice in a room full of people, you will be able to see the lava flowing, hear it sizzling, and feel the heat that radiates from it. We walk along the black lava beach and bird cliffs at Reynisfjara, see interesting basalt columns and rock formations. In the afternoon we stop at Sólheimajökull glacier tounge where you can join an optional glacier hike. It's an informative and easy glacier walk through a frozen wonderland of different shades of glacier ice. Price per person ISK 23.000.-

*Overnight location:*

*Hotel Stracta, Hella, South Iceland. (220km / 137mils)*

## Day 3: Landmannalaugar & Microbrewery

Today we drive the rough unpaved road to Landmannalaugar, an oasis in the barren highlands, surrounded by vivid rhyolite mountains. The highlight is a 90-minute round-trip hike up toward Brennisteinsalda, the rainbow mountain of Iceland, which is still "hot" and where you can see sizzling sulfur springs and vapor at its sides. It could very well be the most colorful and spectacular volcanic mountain of Iceland, and so its picture is often found in books and calendars. After a picnic lunch, you have free time to enjoy a relaxing bath in the natural geothermal stream. We take a short stop at the beautiful waterfall Hjalparfoss surrounded by unusual basalt rock formations.

*Colourful mountains of Landmannalaugar*

*Hjálparfoss waterfall*

Before we reach our last overnight location in Reykjavík, let us visit Ölvisholt, a microbrewery located at an old dairy farm in South Iceland. You will get an introduction to the brewery's history, the brewing process, and of course, try a selection of Icelandic beer. (310km / 193mils)

NOTE: Itineraries may be subject to change at short notice during severe weather conditions and certain outdoor activities/day trips may be cancelled during the winter season in Iceland. In these rare cases, where situations of force majeure apply, excursions/activities cannot be refunded but the local guides will try their best to find reasonable alternatives where and whenever possible.

NOTE: Accommodations are subject to change.
